EXPERIENCE

Senior Software Engineer

Brain Station 23

Nov 2022 – Present | Dhaka, Bangladesh

- Led backend and full-stack delivery across telecom and e-commerce products, focusing on reliable, maintainable production systems.
- Improved backend reliability through API development, database optimization, Redis caching, Kafka-based asynchronous processing, and structured troubleshooting.
- Drove technical decisions across projects, balancing delivery timelines, maintainability, performance, and production stability.
- Coordinated development tasks and dependencies across distributed team members, keeping deliverables aligned with priorities and timelines.
- Mentored junior and mid-level developers through debugging support, architecture discussions, code reviews, and implementation guidance.
- Built and maintained services using Node.js, Express, Go, Laravel, PHP, MySQL, PostgreSQL, MongoDB, DynamoDB, Redis, Kafka, and Docker.

Software Engineer

Oceanize Bangladesh

Apr 2017 – Nov 2022 | Dhaka, Bangladesh

- Delivered and maintained business applications across multiple domains, improving application stability, maintainability, and delivery velocity.
- Supported a Japan-based B2B platform, collaborating remotely with an international client to deliver reliable business workflows and maintainable backend/frontend functionality.
- Built and maintained Node.js/Express backend services supporting mobile application functionality and third-party API integration.
- Supported IoT and video platform products across backend and database components, maintaining stable data handling and dependable service behavior.
- Delivered frontend and platform functionality for social-management and workspace systems using React and Vue.js.
- Participated in maintenance, debugging, enhancements, and cross-functional delivery across multiple production applications.

EDUCATION

Bachelor of Science in Computer Science & Engineering

Stamford University Bangladesh

2012 | GPA 3.23/4.00 | Bangladesh

CERTIFICATIONS

- Red Hat Certified System Administrator (RHCSA) — Credential ID: 220-053-649
- Certified Kubernetes Administrator (CKA) — In Progress

SUMMARY

Senior software engineer with 8+ years of experience in backend-focused full-stack development, building and maintaining production systems across telecom, e-commerce, B2B, mobile, IoT, publication, video, and social-management platforms. Strong expertise in Node.js, Go, PHP/Laravel, JavaScript, SQL/NoSQL databases, Redis, Kafka, Docker, and Kubernetes. Experienced supporting international clients and distributed teams, including a Japan-based B2B platform. Seeking a Senior Backend / Full-Stack Engineer role on a remote or distributed team, where I can apply my production delivery and system reliability experience to help ship and scale dependable software.

KEY ACHIEVEMENTS

- **Technical Leadership**
  Coordinated development work, supported team members, and contributed to technical decisions across production projects.
- **Performance & Reliability**
  Improved application performance and stability through query optimization, Redis caching, refactoring, and systematic troubleshooting.
- **Backend Engineering**
  Built and maintained reusable APIs and backend services across Node.js, Express, Go, Laravel, PHP, SQL/NoSQL databases, Redis, and Kafka.
